*** TRAINING ANNOUNCEMENT ***

Latent Fingerprint Processing Class

This 3-day workshop is designed for police officers, detectives, crime scene investigators, and criminalists who process evidence for latent prints. Inexperienced officers and seasoned investigators alike will expand their abilities using the concepts and methods taught in this class.

This course focuses on the **proper order of techniques** used to process different types of evidence for latent ridge detail. The sequences of processing techniques taught in this class are in accordance with SWGFAST recommendations and IAI Crime Scene Certification reference materials.

Students will benefit from various lectures with case examples in combination with several hands-on exercises. The practical exercises will expose students to common chemicals, powders, and forensic light sources used on different evidence surfaces to yield the best results. The last day of the class will focus on documenting developed ridge detail with macro photography.

About the Instructor: **Timothy J. Burt, CCSA/CCSR**

Timothy J. Burt has over 10 years of forensic experience with the Dover NH Police Department, an agency accredited by the Commission on Accreditation for Law Enforcement Agencies (CALEA). Tim is currently employed as the lead detective of the Dover Police Department's Crime Scene Unit, which is accredited by the American Society of Crime Lab Directors /Laboratory Accreditation Board (ASCLD-LAB). Tim is a certified police officer, has provided expert testimony as a Crime Scene Analyst and holds certifications as a Crime Scene Analyst and a Crime Scene Reconstructionist by the International Association for Identification (IAI).
